Personal Projects

Portfolio Site

HTML/CSS/JS

<https://jebbwebb.github.io/Portfolio2/>

- Created a personal portfolio site so I can showcase all my favorite projects.

Multi-Form

React

<https://github.com/jebbwebb/recipe-search>

- A React app using Redux/Router. This app simulates a multi step form you may find on a subscription setup page for a website.

E-Commerce Website

HTML/CSS/JS

<https://inspiring-raman-ffffad0.netlify.app/#>

- An e-commerce website built using vanilla JS/HTML/CSS. This site has implemented a fully functional shopping cart.

Planet Facts Site

HTML/CSS/JS

<https://jebbwebb.github.io/planet-facts-site/tlify.app/#>

- A single page application built with JS and CSS. Toggles between different planets,images,information.
